**Frameworks**: Angular 8+, Ionic Framework
**Technologies**: HTML5, CSS3, SCSS, Bootstrap, Material UI, UI/UX
**Tools**: Firebase, REST APIs, TypeSense Search

## Experience

**Instant Systems Inc**                                                                       New Delhi, India
*Angular Developer*                                                                       *March 2024 – April 2024*
- Integrated Ozonetal cloud-telephony into the Clove Dental software.
- Implemented custom Ozonetel widget and SSE event for cloud calls.

**Build With Innovation**                                                                       New Delhi, India
*Software Developer*                                                                       *Aug 2021 – Jan 2024*
- Enhanced app, website, and admin panel UI for clients, resulting in a 25% increase in user engagement and customer satisfaction.
- Developed a WhatsApp chatbot builder within the admin interface that automates conversations with customers, resulting in a more efficient workflow and a 20% reduction in task completion time
- Collaborated and maintained Firebase serverless functions using Node.js with the back-end development team, improving the overall performance of the application.
- Integrated TypeSense search across all platforms (app, website, admin), optimizing frontend & backend operations achieving a 15% faster response time.
- Created reusable and responsive UI modules and components, achieving a 10% reduction in development time and fostering improved code maintainability for an agile workflow.

**Freelance**                                                                       Remote
*Web Developer*                                                                       *April 2021 – July 2021*
- Delivered 5+ visually appealing and functional web/app projects across diverse domains, demonstrated adaptability and expertise in crafting optimal solutions for clients.

## Projects

**EMB WhatsApp - CRM** | *Angular, Node.js, Firebase*
- Engineered a WhatsApp chatbot builder in the admin interface that automates communication according to pre-determined scenarios.
- Developed a WhatsApp live chat screen component through Firebase, amplifying real-time engagement and delivering an exceptional user experience.

**Party Nights - Club & Pub Bookings** | *Angular, Node.js, Firebase*
- Implemented a secure QR code ticket system for vendor-based club/pub bookings using Firebase serverless functions and Node.js, enabling frictionless entry via app and website.

**VfashU - Fashion E-Commerce** | *Angular, Node.js, Firebase*
- Created a scalable, customizable vendor subscription model with payment gateway using Firebase schedule functions and Node.js, seamlessly providing access to plan-specific features across the app, admin, and website.

## Education

**ADMEC Multimedia**                                                                       New Delhi, India
*Diploma in Web Development*                                                                       *2019 – 2021*

**University of Delhi**                                                                       New Delhi, India
*Bachelor Of Commerce (B.COM)*                                                                       *2017 – 2020*
